

geotechnical foundation systems

Dec 2014 - GTPE course

Paul W. Mayne, PhD, P.E.

Georgia Tech Global Learning Center, Atlanta

geotechnical foundation systems

Paul W. Mayne, PhD, P.E.
Professor - Geosystems Engineering Group
School of Civil & Environmental Engineering
Georgia Institute of Technology\
790 Atlantic Drive
Mason Building Room 2245
Atlanta, GA 30332-0355

Phone: 404-894-6226

Fax: 404-894-2281

Email: paul.mayne@ce.gatech.edu

CEE Website: www.ce.gatech.edu/research/geosystems

Vice President for North American: www.issmge.org

Technical Committee on In-Situ Testing: www.webforum.com/tc16

12th Australia-NZ Geomechanics Conference (Feb 2015): <http://www.anz2015.com/>

3rd IS Frontiers in Offshore Geotechnics - Oslo - June 2015: <http://www.isfog2015.no>

XVI European Conf. Soil Mechanics and Geot Engrg - Sept 2015. Edinburgh: xvi-ecsmge-2015.org.uk

XV PanAmerican Conf. Soil Mechanics & Geot Engrg - Nov. 2015 Buenos Aires: conferencesba2015.com.ar

5th International Site Characterization (ISC-5), Sept 2016, Gold Coast/Brisbane, Australia: www.issmge.org

Dec 2014 - GTPE course

Geotechnical Foundation Systems - Table of Contents

Overview	1
Overburden stress profiles.....	5
Critical state soil mechanics for dummies.....	8
Geotechnical site characterization 2014.....	13
In-Situ Testing.....	18
Geophysics.....	28
Geoparameter evaluation.....	37
 SHALLOW FOUNDATIONS.....	 52
Bearing Capacity by limit equilibrium.....	54
BC by Limit Plasticity Analyses.....	56
Case studies on bearing capacity.....	66
Interpretation of "capacity" from load tests.....	70
Stress distributions beneath surface loaded areas.....	80
Displacement influence factors.....	85
Approximate solutions using spreadsheets (Mayne & Poulos).....	96
Direct CPT method for footing response.....	113
Foundations on fractured and jointed rock.....	128
DEEP FOUNDATIONS.....	135
Driven pilings versus bored/augered/drilled deep foundations	135
Interpretation of pile load tests.....	140
Calculation of axial pile capacity.....	143
Axial load-displacement response of deep foundations.....	157
Load Resistance Factored Design (LRFD).....	166
Drilled shaft response in Piedmont residuum.....	169
Evaluating Axial Pile Response from CPT (Mike O'Neill Lecture).....	186
Nonlinear pile response from seismic cone tests.....	204
Updated Unicone Method by GT Geosystems Engineering.....	218
Lateral and moment capacity of pile foundations.....	219
Analyses of lateral pile displacements	230
Class "A" evaluation of lateral pile response at Opelika NGES.....	244
GROUND MODIFICATION (site improvement methods).....	248
UNITS CONVERSIONS.....	256
